Overview of Operations – Q1/ FY 2025-26

Total Comprehensive Income for Q1 FY 2025-26 stood at ₹ 739 Cr as compared to ₹ 993 Cr for Q1 FY 2024-25.

Whilst the Company's underlying business remains resilient, the performance in the current quarter was particularly impacted due to lower power demand following the early onset of monsoon and elevated gas prices, impacting merchant gains from gas-based generation. Adjusted for these, TCI remained comparable to the same quarter last year. Major reasons contributing to the performance were:

- ↑ Improved contributions from renewable segment, driven by solar capacity additions and favourable wind conditions, resulting in better PLF.
- ↑ Adjusted for one-time tariff order income in the previous year, improvement in operational parameters contributed to a higher profitability in the Distribution business.

Company remains well-positioned to navigate cyclical variations, supported by its diversified business operations.

* In FY23, geo-political and other factors kept international gas prices elevated, leading to reduced utilization of gas-based plant capacities.

- Following stabilization of gas prices, overall Plant Load Factor improved due to increased power demand and government initiatives to maximize use of gas-based capacities.
