

ENERGY POLICY

Torrent Power Limited Distribution (TPL-D) is committed to achieve excellence in efficient and economic management of energy resources and to be a globally leading power distribution company in the sphere of energy efficiency.

TPL-D is committed to adopt latest and energy efficient technologies and maintain international standards of Energy Management System to ensure long term sustainability.

TPL-D is committed to comply with all relevant legal and other requirements of Energy Management System.

TPL-D shall endeavor to:

- > Set new benchmarks in energy management through the pursuit of excellence and responsible corporate culture.
- > Ensure that all business decisions are supporting energy efficiency and energy conservation.
- > Continually improve energy efficiency by adopting energy efficient products and services in all operational activities based on techno-commercial feasibility.
- > Provide required framework and resources to establish energy management objectives and targets.
- > Provide necessary awareness and training to employees and other stakeholders as relevant to enhance energy performance and promote energy conservation.
- > Continually improve energy management system by ensuring timely audit, periodic review and updating benchmarks.
- > Promote a culture of innovation and creativity and engage employees and other stakeholders as relevant to continually improve energy performance through consultation and participation.
- > Review and continually improve the energy performance by monitoring, measurement and analysis of energy consumption.
- > Ensure that appropriate resources are available to fully implement Energy Management System and the Energy Policy.
- > Review and update the Energy Policy periodically.
