

ENVIRONMENT POLICY

Torrent Power Limited Distribution (TPL-D) is committed to achieve excellence in environmental performance and to be a globally leading power distribution company in the sphere of environmental sustainability.

TPL-D is committed to comply with legal and other requirements of Environment Management System and provide clean, safe and healthy work environment to all its employees and stakeholders.

TPL-D is committed to protect the environment and carry out planning, procurement, project execution, operation & maintenance of power transmission & distribution systems and customer services activities in an environmentally sensitive and responsible manner.

TPL-D aims to achieve 'ZERO INCIDENT' related to environment and to be at the forefront by setting new benchmarks in the field of environmental sustainability.

TPL-D shall endeavor to:

- > Ensure that all business decisions are supporting environmental sustainability, prevention of pollution, reduction of GHG emission and protection and stewardship of environment.
- > Conserve natural resources by adopting the best available technology, improving efficiency and reducing wastages.
- > Provide required framework and resources to establish environment management objectives and targets.
- > Ensure that the environmental requirements are met and life cycle concept is incorporated for material and services during procurement, project execution and operation & maintenance.
- > Continually improve environment management system by ensuring timely audit, periodic review and updating benchmarks.
- > Provide necessary awareness and training periodically to employees and other stakeholders as relevant to meet environmental sustainability standards.
- > Promote a culture of consultation and participation to engage employees and other stakeholders for sustainable wellbeing and conservation of environment.
- > Ensure that appropriate resources are available to fully implement Environment Management System and the Environment Policy.
- > Review and update the Environment Policy periodically.
